# Drone operation Planica

AIRTIME FPV VISION + ABOVE MEDIA AS

Concept of Operations for Ski Jumping Live Drone in the  
SPECIFIC CATEGORY

HS138 + GENERAL OVERVIEW

GENERAL

First Person View – FPV drone flying behind ski jumpers  
for live broadcast

The operation is divided in two phases:  
"HOT ZONE" & "COLD ZONE"

- HOT ZONE: when the drone is following the athlete –  
HIGH SPEED
- COLD ZONE: when the drone is on the transportation  
paths – SLOW SPEED

DRONE CAMP (pos. 0)

The drone camp's position is crucial for a safe operation.  
This implies visual line of sight "VLOS" to the drone at all  
times. The suggested position is the second top level of  
the TV tower, as the top level is occupied by two camera  
platforms (Alternative positions TBD)

SYSTEM IN USE

- Custom built FPV drone
- AUW: approx. 850 grams
- Max characteristics: 41cm

LEGEND

- PINK = HOT ZONE and main flight path
- BLUE = COLD ZONE 1 transportation route
- GREEN = COLD ZONE 2 landing/takeoff route
- RED = HOT ZONE barrier guard blockage
- POS 1 = Start of HOT ZONE
- POS 2 = End of HOT ZONE
